

Meet the Maker

Come and meet Peter Dunne, the man responsible for this unique and clever product. He will be doing a demonstration of the Rouge O2.

Rouge O₂[®]

ELECTRONIC WINE BREATHER

The Rouge O2 electronic wine breather is the first of its kind in the world, being electronic! To enjoy most wines you should allow them to breath or decant for at least an hour before drinking, but how often do we forget or not allow enough time.

The Rouge O2 is the perfect solution reducing breathing time from two hours to one minute in a controlled way. It works by gently bubbling air through the wine, releasing its full bouquet and flavour.

Operating on triple AAA batteries it can be used on over 230 bottle types and has an automatic mechanism to ensure the correct breathing time.
